## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1745

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4-9 and 12-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,316,135 in view of either Creeron *et al.* (US 5,571,420 or Möhring *et al.* (US 4,326,086). The present claims differ from the patented claims in that the latter are more specific, reciting a type of antifreeze solutions containing alkanetriols. Some of the patented claims specifically recite glycerol, butanetriol and pentanetriol. The present claims recite the broader term "special antifreeze solution". The present claims thus encompass the subject matter of the patented claims. This rejection will therefore posit that the narrower claims would be obvious over the broader claims, in view of the secondary references. Creeron *et al.* discloses automotive antifreeze, and teaches glycerol as a component thereof (column 9, lines 28-34). Möhring *et al.* disclose the compounds butanetriol and hexanetriol (column 7, lines 64-65) and teach that they are useful as an antifreeze (column 10, lines 55-58). In view of these teachings, it would be obvious to use as the antifreeze component in the presently claimed solution, the glycerol, butanetriol or generally recited alkanetriols recited in the claims of Patent No. 6,316,135.

Art Unit: 1745

Applicant's arguments with respect to claims 1, 4-9 and 12-15 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's declaration has been reviewed and found persuasive concerning the ability of the ordinary artisan to test the properties of antifreeze solutions, and to determine which solutions meet the presently recited criteria.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boluk *et al.* (US 5,968,407) disclose a glycol-based deicing composition. Schuster *et al.* (US 5,210,335) disclose a method of making polyhydric alcohols. Breault (US 6,548,200) and Breault *et al.* (US 6,461,753) disclose fuel cells with antifreeze coolants.
